ABOUT ME

Since my early days, I have been captivated by modern technology, computers, and the vast world of informatics. Alongside my passion for IT, I am enthusiastic about bushcraft, MMA, and fantasy.

At this stage of my career, I am eager to delve into various IT roles and professions, such as backend development, DevOps, cybersecurity, and even OS development. I have youth and unlimited energy on my side, and I am determined to make the most of every opportunity.

EXPERIENCE

Graphics Software Development Intern
Intel Corporation (2022 – 2023)
- Contributed to building and modernizing an internal graphics environment for running graphics card tests.
- Worked primarily with Angular, TypeScript, and SCSS.
- Developed new frontend solutions for efficient data flow and structuring.

EDUCATION

Bachelor's Degree - Computer Science
University of Gdańsk
My studies covered a diverse array of computer science disciplines, starting from front-end and back-end development to computer networking, operating system comprehension, server administration, and numerical algorithms. Additionally, I delved into topics such as database management and cybersecurity to gain a comprehensive understanding of the field.

CERTIFICATES

CCNA R&S: Introduction to Networks

NDG Linux Essentials
